The requirements for Project #2 are as follows:

- Must use a Node and Express Web Server
- Must be backed by a MySQL Database (Sequelize ORM is a bonus, but strongly encouraged)
- Must have both GET and POST routes for retrieving and adding new data
- Must be deployed using Heroku (with Data)
- Must utilize at least one new library, package, or technology that we haven't discussed
- Must have a polished frontend / UI (handlebars is optional)
- Must have folder structure that meets MVC Paradigm
- Must meet good quality coding standards (indentation, scoping, naming)

Category	Criteria
MOST CREATIVE	Novel concept Novel use of API Out of the box thinking
MOST DISRUPTIVE	Solves for immediate market problem Evident market segment that is underserved Strong team dynamics Most likely to attract Venture Funding
MOST TECHNICALLY CHALLENGING	Aggressive use of APIs Complex web navigation Complex db services Used a more complex set of technologies
MOST ENTERTAINING	Engaging presentation style Engaging and humorous web site function Evident it will attract an audience Highly receptive audience -- most laughs!
TOP DESIGN	Professionally styled Attractive web site features Excellent and novel navigation Demonstrates very thoughtful design
BEST ALL AROUND PROJECT	High quality presentation Solution addresses a market problem Well composed solution Excellent use of technologies Highly rated in categories above

BEFORE YOU LEAVE TODAY – SLACK TO PAT, JEFF AND TAs:

o Project Title

o Team Members

o Project Description (3-5 sentences)

o Technology you plan to use (including APIs if identified)
